gcuadros.dev/en · github.com/gCuadros

Professional profile

Frontend Tech Lead with experience in high-traffic digital products at MANGO and Freepik. Specialising in frontend architecture with React, Next.js and TypeScript, monorepos and DevOps. Experience in continuous integration and delivery (CI/CD), infrastructure as code and deployments on Google Cloud Platform (GCP).

At MANGO, I share architectural decisions and migration planning with other Tech Leads. Alongside that work, I automate development processes and mentor developers.

Professional experience

MANGO - Frontend Tech Lead

January 2025 - present

- Technical mentoring, one-to-ones and feedback for developers.
- Shared architectural decisions with other Tech Leads, with a focus on performance and maintainability for a high-traffic platform.
- Frontend continuous integration and delivery, deployment automation and observability.
- Participation in technical interviews and professional development plans as a Tech Lead.

GFT · MANGO project

Frontend Tech Lead · July 2024 - January 2025

Senior Frontend Engineer · June 2023 - July 2024

- Frontend development for the MANGO platform.
- As Tech Lead, helped define architecture, development standards and the technical roadmap.

Wuolah

Tech Lead, Front End · January 2023 - June 2023

Senior Frontend Developer · July 2022 - January 2023

- Technical leadership of the frontend team: architecture, standards and priorities.
- Migration to Next.js and TypeScript, adoption of React Query, and repository consolidation with Turborepo.

Freepik - Frontend Developer

July 2020 - July 2022

- Frontend development for a high-traffic platform: contributed to migration to Next.js and conversion of JavaScript to TypeScript.
- Managed GCP deployments and infrastructure, including sandbox environments.

Cash Converters España - Frontend Developer

March 2019 - July 2020 · Málaga

- Frontend development and UX/UI contributions: React/Redux, Angular/NgRx, HTML/CSS/Sass and Salesforce Commerce Cloud.

Technical skills

- **Frontend:** React, Next.js, TypeScript, microfrontend architecture, monorepos with Turborepo and design systems.
- **DevOps and Platform Engineering:** continuous integration and delivery (CI/CD), Terraform and infrastructure as code (IaC), Google Cloud Platform (GCP), Jenkins and observability with Dynatrace.
- **Web quality:** performance, Core Web Vitals and developer experience.
- **Technical leadership:** shared architectural decisions, mentoring, feedback and team support.

Projects

Hevy Coach MCP

A Model Context Protocol (MCP) server connecting Hevy workout data with AI assistants. It reads workouts and routines, calculates progress metrics, creates routines and logs bodyweight. It calls the API without a local cache or database and identifies write tools so the MCP client can apply its confirmation controls.

Project code

Talks and teaching

- **Next.js strategies - Garaje de ideas:** live coding on rendering and streaming. Video (Spanish).
- **Fabrics 2025 - MANGO:** speaker. Read article.
- **Codespace Academy · June 2023 - August 2024:** guest educator. Designed and delivered sessions on frontend fundamentals and advanced Next.js techniques.

Education and training

Master's in DevOps & Cloud - UNIR · September 2025 - June 2026 · Grade: 9

Deployment automation, infrastructure as code, containers and cloud. Academic training in AWS, Azure, Kubernetes and Ansible.

Computer Software Engineering - Universitat Oberta de Catalunya · October 2012 - June 2018

Full Stack Development Bootcamp - Codespace Academy · 2018 - 2019

Web/Multimedia Management and Webmaster - Cesur · October 2010 - October 2012
