Professional profile

Frontend Tech Lead specialising in frontend architecture with React, Next.js and TypeScript, monorepo migrations and DevOps for frontend. Experience in CI/CD, infrastructure as code and deployments on Google Cloud Platform (GCP).

At MANGO, I provide technical leadership and support development teams. I share architectural decisions and migration planning with other Tech Leads, combining platform evolution, automation and mentoring.

Professional experience

MANGO - Frontend Tech Lead

January 2025 - present

- Technical leadership and team support through mentoring, one-to-ones, feedback and professional development.
- Architectural decisions shared with other Tech Leads to improve frontend platform maintainability and support its evolution.
- Frontend continuous integration and delivery, deployment automation and observability.
- Contribution to interviews and development plans as a technical lead.

GFT · MANGO project

Frontend Tech Lead · July 2024 - January 2025

Senior Frontend Engineer · June 2023 - July 2024

- Frontend development and contributions to platform evolution.
- As Tech Lead, defined architecture, standards and the technical roadmap, and drove platform development.

Wuolah

Tech Lead, Front End · January 2023 - June 2023

Senior Frontend Developer · July 2022 - January 2023

- Technical leadership of the frontend team: architecture, standards and priorities.
- Migration to Next.js and TypeScript, adoption of React Query, and repository consolidation with Turborepo.

Freepik - Frontend Developer

July 2020 - July 2022

- Contributed to migration to Next.js and conversion of JavaScript code to TypeScript.
- Managed GCP deployments and infrastructure, including sandbox environments.

Cash Converters España - Frontend Developer

March 2019 - July 2020 · Málaga

- Frontend development and UX/UI contributions: React/Redux, Angular/NgRx, HTML/CSS/Sass and Salesforce Commerce Cloud.

Technical skills

- **Frontend:** React, Next.js, TypeScript, microfrontend architecture, monorepos with Turborepo and design systems.
- **DevOps and Platform Engineering:** continuous integration and delivery (CI/CD), Terraform and infrastructure as code (IaC), Google Cloud Platform (GCP), Jenkins and observability with Dynatrace.
- **Web quality:** performance, Core Web Vitals and developer experience.
- **Technical leadership:** shared architectural decisions, mentoring, feedback and team support.

Projects

Heavy Coach MCP

A Model Context Protocol (MCP) server connecting Heavy training data with AI assistants. It reads workouts and routines, calculates progress metrics, creates routines and logs bodyweight. No cache or database: each query calls the Heavy API live. Write tools are declared separately so the MCP client can apply its confirmation controls.

Talks and teaching

- **Next.js strategies - Garaje de ideas:** rendering and streaming. [Video \(Spanish\)](#).
- **Fabrics 2025 - MANGO:** speaker. [View post](#).
- **Codespace Academy · June 2023 - August 2024:** guest educator. Designed and delivered sessions from frontend fundamentals to advanced Next.js techniques.

Education and training

Master's in DevOps & Cloud - UNIR · September 2025 - June 2026 · Grade: 9

Deployment automation, infrastructure as code, containers and cloud. Academic training in AWS, Azure, Kubernetes and Ansible.

Computer Software Engineering - Universitat Oberta de Catalunya · October 2012 - June 2018

Full Stack Development Bootcamp - Code Space · 2018 - 2019

Web/Multimedia Management and Webmaster - Cesur · October 2010 - October 2012
